

PTFE RADIAL SHAFT SEALS

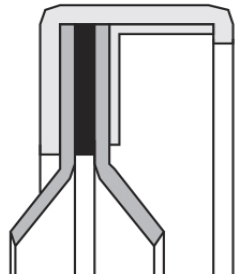

Besides standard profiles and materials range for radial shaft seals, **STS Sealing Technical Solutions**, can supply PTFE radial sealing lips, stainless steel metal case and static seal out of VMQ or FKM.

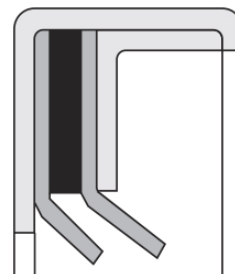

According specific working conditions, we can supply following profiles :

SATA

SATB

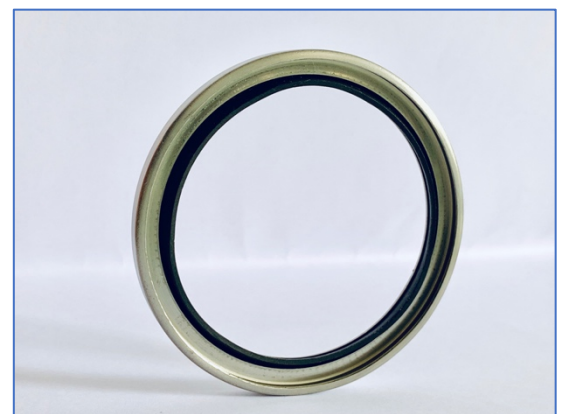

SATK

Working parameters are related to profiles and materials.
Indicatively we can have :

- Temperature - 40°C ÷ + 200°C
- Pressure 7÷10 bar
- Speed 25÷40 m/s

Pressure-speed values can't be reached simultaneously at maximum values.

Certified FDA materials are available for food industry applications.
